

# Looking to grow your business?

## Partner with PEER

Females are significantly underrepresented in technical trades and PEER is looking to change this with our female-only pre-apprenticeship program. To make this change, we need support from organisations such as yours, to host participants for work experience.

Our 8-week, female-only pre-apprenticeship program consists of 6 weeks at PEER's Technical Training Centre and 2 weeks work experience, providing a pathway into an apprenticeship. Participants learn valuable foundation skills, safety awareness, hand skill development & trade terminology.

If you're interested in actively making a change in technical trades and would like to host a student from our female-only pre-apprenticeship program, please call our Customer Service Team on 8348 1200.

### WHY PARTNER WITH PEER?

#### Award-Winning Apprentices

Our apprentices are dedicated to building a fulfilling career in the industry. We support our people to be:

- committed to getting the job done
